

# Rocket® Zack™

## For Advanced Console Automation and Event Management

Rocket® Zack™ is an all-encompassing, rule-driven solution designed to streamline console automation in z/OS® environments. This powerful software monitors mainframe system consoles, offering message-based automation for enhanced operational efficiency. With Zack at the helm, system events and console activities are seamlessly managed, eliminating the cumbersome process of creating custom manual scripts typically required for intricate automation tasks. Moreover, advanced automation tasks are effortlessly handled through the utilization of standard IBM® REXX™ capabilities.

### Benefits/Features

#### Optimize processes

Automates and improves system reliability and maximizes IT resources.

#### User-friendly and cost-effective

Incorporates easy-to-use features and automatic actions that reduce costs.

#### Support advanced automation

This ensures high availability and minimizes system downtime.

#### Workload enablement

With Rocket® JCLPREP and Rocket® Zara™.

#### Maximize throughput

Zack maximizes throughput by reducing or eliminating console traffic.

#### Scheduling, automation, and integration solutions

With Rocket® Zeke™, Rocket® Zena™, Rocket® Zebb™, and Rocket® Outbound™.

Rocket® Software's suite of workload automation solutions simplifies and optimizes your end-to-end value streams. **Learn more about our solutions:**

**Zack™**  
Advanced console automation and event management

**Zebb™**  
Automated process restart management

### Benefits of Rocket® Zack™ include:

-  Works with other Rocket solutions to provide integrated workload management, platform and application transparency, as well as BSM support
-  Captures, suppresses, and responds to Write-to-Operator (WTO) messages
-  Intercepts and intelligently responds to Write-to-Operator Reply (WTOR) messages
-  Manages message traffic by highlighting, lowlighting, consolidating, and suppressing messages
-  Provides comprehensive and pre-defined message management rule sets
-  Consolidates message traffic from multiple systems for centralized management
-  Sequences automation events such as IPL process automation
-  Propagates automation data through global, shared, and system variables
-  Automates system events based on Time-of-Day (TOD) requirements
-  Provides schedule flexibility through versatile calendar- and time-based definitions

**Rocket Zack provides complete IBM Z® console automation** that frees up operations staff and keeps your business flowing.
